SUBJECT: Contract A-101, Proposal for Bonded Spares

TO: 

25X1A

Dear Sid,

Reference is made to CMCC Doc. no. 151X5.11149 dated 30 June 1958 with inclosures. This document was submitted by the contractor to Dan with an information copy to the Depot.

We would like to call the contracting officers' attention to the fact that referenced proposal does not include any provision for periodic reports to the Depot.

Further, the proposed bonded spares as set forth in exhibits A and B of referenced proposal are not identified with MP numbers consistent with other spares listings. It would be impossible to absorb any left over bonded spares into our stocks unless all bonded spares were assigned MP stock numbers.

Consistent with procedures already established for other contracts we recommend the following:

1. Make provisions for periodic reports by the contractor to the Depot which would reflect the items consumed and the on hand balances of bonded spares. These reports should be submitted every six (6) months.
2. Assign MP stock numbers to all bonded spares consistent with existing spares lists for System I and III. Reports to be submitted and accountability to be maintained by the contractor utilizing these MP numbers.

File Nr. 2726

It is believed that the above recommendations are a minimum requirement to enable the Depot to withdraw bonded spares in cases of urgent requirements in the field and to facilitate the absorption of bonded spares into Depot stocks upon termination of repair contract.

Sincerely,

25X1A
